EDUCATION

Rutgers Business School

B.S. Business Analytics & Information Technology - Minor: Data Science

New Brunswick, NJ

Expected January 2027

- **Honors:** Dean's List
- **Relevant Coursework:** Data Analytics, Database Management, Data Mining, Econometrics, Management Information Systems, Statistical Learning

SKILLS & INTERESTS

Programming & Analytics: Python, SQL, R, Advanced Excel

Statistical Methods & Visualization: A/B Testing, Regression Analysis, Statistical Modeling, Data Visualization (Tableau), Figma

Project Management: Agile/Scrum, Milestone Tracking, Risk Assessment, Stakeholder Communication, Deliverables Management

Interests: Architecture, DJing, Tennis, Traveling, UI/UX, Oceanography, Gunpla

TECHNICAL PROJECTS

Interactive Sales Dashboard | Tableau, SQL, ETL | May 2025

- Developed an interactive executive dashboard with time-series forecasting and drill-down filters to visualize revenue, margin, and geographic performance.
- Designed exportable reporting features to streamline data delivery for cross-functional stakeholders.

Customer Cohort Analysis | Python, Pandas, Plotly | March 2025

- Built interactive visualizations for cohort retention and customer lifetime value (LTV), segmenting users by acquisition channel and time period.
- Modeled churn curves and conversion funnels to identify user drop-off points for product growth initiatives.

Marketing A/B Test Dashboard | Tableau, Statistical Analysis | January 2025

- Created an experiment-tracking dashboard featuring automated significance calculations, confidence intervals, and metric breakdowns to support product and marketing teams.

PROFESSIONAL EXPERIENCE

Technical Services and Operations (Systems Engineer Student Lead)

September 2024 - Current

Rutgers Digital Classroom Services,

New Brunswick, NJ

- Analyzed recurring technical issues across 80+ classrooms to implement process improvements that reduced service response times.
- Led a team of 4 technicians, delivering technical support and troubleshooting for 200+ faculty members.

Project Manager

July 2024 - Current

Wong Way Media,

New Brunswick, NJ

- Oversee operations across 3 initiatives, managing milestones, deliverables, and resource allocation to ensure on-time delivery.
- Build risk-tracking dashboards and standardized templates adopted across teams, reducing manual status reporting time by 35%.
- Lead full project lifecycles, coordinating with cross-functional teams and resolving action items to maintain delivery timelines.
- Analyze project data to identify workflow bottlenecks, driving process improvements, and increasing team efficiency by 25%.

Data Analyst & Operations Intern

April 2025 - September 2025

Underground Village Brewing Company,

Somerville, NJ

- Developed automated ETL pipelines in Python and SQL to extract, clean, and consolidate operational and customer data, reducing manual processing time by 3 hours/week.
- Built an interactive Tableau dashboard tracking KPIs and ROI, adopted by leadership for weekly program decisions.
- Conducted A/B testing and statistical analysis on marketing campaigns, increasing event attendance by 15%.
- Managed technical event logistics, ensuring seamless execution aligned with program objectives.

Warehouse Manager - Logistics & Operations

September 2023 - September 2024

Sunflow,

Edison, NJ

- Supported ERP system migration and led data audits that improved order accuracy by 10%, ensuring data integrity across operations.
- Redesigned workflow processes and implemented real-time tracking, cutting shipping delays by 20%.

UI/UX Fellow

February 2024 - April 2024

Rutgers Blueprint,

New Brunswick, NJ

- Conducted usability testing with 100+ participants, synthesizing feedback and data to improve design decisions and user experience.
